### Description

**Uses & Effectiveness Overview** European five-finger grass is an herb. The whole dried plant is used to make medicine. People take European five-finger grass for diarrhea and fever, and use it in mouthwashes, but there is no good scientific evidence to support these uses. The European five-finger grass, also known as *Potentilla reptans*, contains high levels of vitamin C, which is essential for boosting the immune system, improving skin health, and reducing the risk of chronic diseases.

**Side Effects** When taken by mouth: There isn't enough reliable information to know if European five-finger grass is safe or what the side effects might be. When applied to the skin: There isn't enough reliable information to know if European five-finger grass is safe or what the side effects might be.

**Interactions** We currently have no information for EUROPEAN FIVE-FINGER GRASS overview.

**Special Precautions and Warnings** When taken by mouth: There isn't enough reliable information to know if European five-finger grass is safe or what the side effects might be. When applied to the skin: There isn't enough reliable information to know if European five-finger grass is safe or what the side effects might be.

**Pregnancy and breast-feeding:** There isn't enough reliable information to know if European five-finger grass is safe to use when pregnant or breast-feeding. Stay on the safe side and avoid use.

**Dosing** The appropriate dose of European five-finger grass depends on several factors such as the user's age, health, and several other conditions. At this time there is not enough scientific information to determine an appropriate range of doses for European five-finger grass. Keep in mind that natural products are not always necessarily safe and dosages can be important. Be sure to follow relevant directions on product labels and consult your pharmacist or physician or other healthcare professional before using.
