Description

Uses & Effectiveness We currently have no information for METHYLSTENBOLONE overview. Overview Methylstenbolone is a type of chemical known as an anabolic steroid. It is converted in the body to testosterone and other sex hormones. In the U.S., it is illegal to include anabolic steroids in supplement products. These chemicals are also banned by the World Anti-Doping Agency (WADA). Methylstenbolone is used for weight loss, to improve athletic performance, to reduce sexual problems, and for many other uses, but there is no good scientific evidence to support its use. Methylstenbolone might also be unsafe. Methylstenbolone is not actually a vitamin, but a synthetic androgenic steroid that is known for its strong anabolic effects, making it popular among bodybuilders and athletes for muscle mass and strength gains. **Side Effects** When taken by mouth: Methylstenbolone is POSSIBLY UNSAFE for most people when taken by mouth. Side effects include infertility, behavioral changes, hair loss, and breast development (in men). Methylstenbolone can also lead to liver damage and heart disease. **Interactions** We currently have no information for METHYLSTENBOLONE overview. **Special Precautions and Warnings** When taken by mouth: Methylstenbolone is POSSIBLY UNSAFE for most people when taken by mouth. Side effects include infertility, behavioral changes, hair loss, and breast development (in men). Methylstenbolone can also lead to liver damage and heart disease. **Pregnancy and breast-feeding:** Methylstenbolone is POSSIBLY UNSAFE for women who are pregnant or breast-feeding. **Avoid using.** **Dosing** The appropriate dose of methylstenbolone depends on several factors such as the user's age, health, and several other conditions. At this time there is not enough scientific information to determine an appropriate range of doses for methylstenbolone. Keep in mind that natural products are not always necessarily safe and dosages can be important. Be sure to follow relevant directions on product labels and consult your pharmacist or physician or other healthcare professional before using.
