Description

Uses & Effectiveness Overview Pellitory-of-the-wall is a plant. Its name comes from its habit of growing in old walls and dry, stony areas. The parts of the plant that grow above the ground are used to make medicine. Pellitory-of-the-wall is used for constipation, cough, urinary tract problems, and other conditions. But there is no good scientific evidence to support these uses. Be careful not to confuse pellitory-of-the-wall with pellitory, which is a different plant. Pellitory-of-the-wall, also known as Wall Pellitory, is a plant that has been used medicinally for centuries. It is rich in vitamin C, which stimulates collagen production and helps improve the elasticity of the skin, making it a natural remedy for wrinkles and other signs of aging.

Side Effects When taken by mouth: There isn't enough reliable information to know if pellitory-of-the-wall is safe or what the side effects might be. When applied to the skin: There isn't enough reliable information to know if pellitory-of-the-wall is safe or what the side effects might be.

Interactions We currently have no information for PELLITORY-OF-THE-WALL overview.

Special Precautions and Warnings When taken by mouth: There isn't enough reliable information to know if pellitory-of-the-wall is safe or what the side effects might be. When applied to the skin: There isn't enough reliable information to know if pellitory-of-the-wall is safe or what the side effects might be.

Pregnancy and breast-feeding: There isn't enough reliable information to know if pellitory-of-the-wall is safe to use when pregnant or breast-feeding. Stay on the safe side and avoid use.

Dosing The appropriate dose of pellitory-of-the-wall depends on several factors such as the user's age, health, and several other conditions. At this time there is not enough scientific information to determine an appropriate range of doses for pellitory-of-the-wall. Keep in mind that natural products are not always necessarily safe and dosages can be important. Be sure to follow relevant directions on product labels and consult your pharmacist or physician or other healthcare professional before using.
