Description

General information Premature ejaculation (synonyms: fast seminal fluid emission, rapid ejaculation) is considered to be as the most widely discussed sexual problems in men. Approximately 30-40% of males face difficulties caused by rapid ejaculation. In other words, such a disorder is the inability to control ejaculation process during coitus, thereby reducing the level of satisfaction of partners. Some people believe that uncontrolled ejaculation is a kind of premature ovulation in males. The names are different but the sense of the issue is one. In most cases, the causes of rapid ejaculation are psychological disorders. At the same time this is not always the case; sometimes, some physiological conditions of men can lead to early or rapid ejaculation, for example inflammatory diseases of the sex glands: colliculitis, vesiculitis, prostatitis. It should be stated that rapid ejaculation treatment is quite a long process. Depending on the causes of this disorder there various treatment methods are practiced: pharmaceutical, physiotherapy, injection or surgical correction of rapid ejaculation. A male with a fast ejaculation constantly has a question in his head: how to prolong sexual intercourse? First of all, men who have difficulty with early ejaculation need to make changes in their diet and regime. Avoid spicy foods and do not overeat. Regular physical exercises will provide more advantages and positive effect; they will help to get rid of the accumulated tension. It is recommended to have sex more often. The less often you do this, the faster ejaculation occurs upon contact. Try to have repeated sexual intercourses. As a rule, they are always longer than the first. In cases where these tips are irrelevant or do not benefit, you have to try Viagra Super Force pills which designed for sexual intercourse prolongation. Today it is believed that Viagra Super Force is the most unique drug. It consists of two active components that increase blood flow to the penis, resulting in a persistent long erection and allowing you to delay the orgasm onset by 3-4 times. The medication begins its action only with sexual arousal. Using Viagra Super Force prior sex will give your woman the most vivid pleasure. The Viagra Super Force includes two strongest components – Sildenafil and Dapoxetine. It is known that Sildenafil is a phosphodiesterase inhibitor (PDE-5), which promotes sufficient blood flow to the reproductive organ. It contributes in the penis muscles relaxation, and this, in turn, helps to maintain a satisfactory erection. Furthermore, such substance as Dapoxetine works by postponing the ejaculation process, allowing a male to fully express feelings to his partner. Dapoxetine was initially designed for depression healing, but was later recognized as an agent which prolongs sexual intercourse. Dapoxetine is known an effective and completely harmless substance aiming at such problems elimination. Unlike other antidepressants, Dapoxetine is absorbed and completely eliminated from the body within a few hours. Dapoxetine prolongs sexual intercourse by four times and improves the

sexual functions of men. This drug has a relaxing effect; it relieves stress and psychological constraints, and aims at prolongation of sexual intercourse pleasure. At the same time Dapoxetine has absolute compatibility with all medications improving sexual function. Such a symbiosis gives a chance to the men to adequately circumvent intimate disorders, to forget possible failures. What is Viagra Super Force? Viagra Super Force is a medication combining sildenafil citrate, the active ingredient in Viagra, and dapoxetine. It is designed to treat both erectile dysfunction and premature ejaculation in men. How does Viagra Super Force work? Viagra Super Force works by enhancing blood flow to the penis (sildenafil) to help maintain an erection and delaying ejaculation (dapoxetine), thereby treating both erectile dysfunction and premature ejaculation simultaneously. How should Viagra Super Force be taken? Viagra Super Force should be taken orally, usually 30 to 60 minutes before sexual activity. It's important to follow the prescription and guidance provided by your healthcare provider. What are the side effects of Viagra Super Force? Common side effects include headaches, dizziness, flushing, indigestion, nasal congestion, and blurred vision. There may also be some side effects from dapoxetine, such as nausea and dizziness. Can Viagra Super Force be taken with alcohol? Alcohol should be avoided or consumed in moderation when taking Viagra Super Force, as it can increase the chances of side effects like dizziness and can decrease the effectiveness of the medication. Is Viagra Super Force suitable for all men with ED and PE? Viagra Super Force may not be suitable for all men, especially those with certain medical conditions or taking certain medications. It's essential to consult with a healthcare provider before starting this medication. How long does the effect of Viagra Super Force last? The effect of Viagra Super Force can last up to 4-6 hours, but this can vary based on individual response and other factors. Does Viagra Super Force require a prescription? Yes, Viagra Super Force is a prescription medication. A consultation with a healthcare provider is necessary to ensure it's safe and appropriate for your specific health needs. Can Viagra Super Force be used for conditions other than ED and PE? Viagra Super Force is specifically formulated for treating erectile dysfunction and premature ejaculation in men. Its use for other conditions is not recommended without medical advice. What should I do if I miss a dose of Viagra Super Force? Viagra Super Force is used as needed, so you are not likely to be on a dosing schedule. Use it as required but avoid using more than one dose in 24 hours. Precautions However there is a number restrictions according to which preparations for rapid ejaculation healing are not recommended if the patient is has: young age (under 18); leukemia; vascular and heart disorders; hypotension, hypertension; retinitis pigment; liver abnormalities; heart failure depression, nervous disorders Allergic reactions to Dapoxetine or Sildenafil Dosage It is better to start using Viagra Super Force tablets in dose of 80 mg (0.5 tablets) approximately 60 minutes before sexual intercourse, increasing the dosage gradually up to 160 mg. If you take more than one pill within 24 hours, instead of the expected result, you can face opposite reactions. In has to be taken into account that alcohol and fatty foods reduce the effectiveness of the medication, so you should exclude a large number of alcoholic beverages. In addition, be sure to remember that Viagra Super Force begins its action only after sexual stimulation. How to take? Rules of taking the drug are extremely important to be followed. It ought to be said that if you know all the recommendations for taking this drug, then you will avoid side effects, overdose and other unpleasant issues. The drug treats sexual impotence of both sexual and psychological nature. Of course it has to be remembered that only an andrologist or, at least, a urologist can prescribe the optimal dosage, therefore, in case of facing any problems, first of all, you should visit a specialist's office. For prophylactic purposes, the use of this drug is recommended for all men after 20 years. The drug helps to improve the intimate relationships quality and bring diversity to male's personal life. It is perfectly suits guys who lead a sedentary lifestyle. Side-effects Viagra Super Force, like any other drug, is characterized by the appearance of some adverse reactions. After the first use of the remedy there were records of such disorders as headache, sometimes dizziness, as well as irregularities in the bowels, increased heartbeat, nasal congestion, and color perception disorders. However, all of them were of a short-term nature, and, having begun regular intake, the discomfort disappears. In some cases men can experience an erection, which can last more than 2 or even 3 hours without ejaculation. To relieve discomfort, it is recommended to drink 0.5 – 1 liter of cold water. Overdose As it is well known, an overdose of any drugs can lead to increased side effects. This drug is no exception. The side effects of taking Sildenafil at a dosage of 800 mg were similar to those that occurred while using the medication at lower doses but increased in frequency. Hemodialysis does not accelerate the Sildenafil (such as cenforce 100, kamagra 100, suhagra 100, revatio 20 mg) elimination from the body, and the substance binds to plasma proteins, and therefore it is not excreted by the kidneys. In this case the symptomatic treatment is recommended. There were no serious adverse

reactions noted during Dapoxetine intake. Adverse reactions of the large amounts of the medication intake can lead to possible migraines, nausea and diarrhea. In case of such disorder manifestation it is strictly prohibited to drink alcohol. This agent is contraindicated to those people who have lactose intolerance and allergies to Dapoxetine. Also it should be noted that this remedy is contraindicated to men who are diagnosed with arrhythmia, heart disorders, renal problems and liver cirrhosis, as well as epileptics. An overdose of the medication is accompanied by a headache. Sometimes there can be a short pain in the joints and lower back, but more often – apathy, as well as an impaired productivity. Interactions Viagra Super Force may not be compatible with other drugs. Some drugs can affect the active ingredient of the drug efficacy. Tell your doctor about any medications you are taking. Do not start or stop taking any medication without consulting your doctor. This applies to both prescription and non-prescription drugs. In addition, this drug should not be used with other drugs aimed at sexual dysfunction treatment. It is strictly prohibited to use drugs containing nitrates on the day of this medication use. Also, tablets should not be combined with antibiotics, any painkillers and sleeping pills. Do not use the drug for other purposes. This medication is not designed to protect you from sexually transmitted diseases. It should be remembered that Sildenafil cannot be used simultaneously with grapefruit, as this leads to an overdose of Sildenafil. Alcohol interaction On the day of using this remedy you should not drink any strong beverages. All of us know that the remedy effectiveness is significantly deteriorating when used with alcohol. Keep in mind that alcohol has a serious impact on a person and his sexual ability. On the one hand, this influence is positive, as a person becomes relaxed and more susceptible to passion. On the other hand, alcohol in large doses can strongly affect the human's body in such a way (up to poisoning when overdosed) that the magic action of this remedy will simply be destroyed. So, Viagra Super Force is a medication, which means that if you have a desire to achieve the maximum effect and not harm your health, you should read the attached to the pills information and take into account all the recommendations indicated there. Reviews Majority of reviews of patients and specialists about the remedy are positive. Many andrologists, urologists and sexologists use this agent in their clinical practice and note its weighty advantages. Ron: I have been using this drug for two years now. It works great. I have strong erection, and I can control ejaculation. I have never experienced any adverse reactions. I like the fact that it acts long enough for having party and all night. Albert: The medication is excellent. I could not decide for a long time what exactly I need, because I have a few problems. The doctor advised to try this remedy. I liked the effect, and the erection is much better, and the duration of intercourse has increased much. Emil: I have never had any problems with potency, but was worried about fast ejaculation during sex. I was not fully satisfied, and my girl-friend remained dissatisfied. I decided to try Viagra Super Force. The result was surprised. These pills not only help to prolong sex, but also improve its quality, and also improve emotional mood. Paul: I was diagnosed with an erection disorder quite recently and I naturally did not intend to put up with this situation. In accordance with the recommendation of the doctor I bought this drug in order to stay in shape. The drug is super and really works, it returns sex power and gives you the opportunity to have sex longer. I have not experienced any side effects. Andrologist: I think this drug is really effective and the best among similar remedies, because it contains two effective active ingredients. Patients are satisfied with the result. I have to add that the remedy is rather well tolerated. As for adverse reactions it should be said that when taken correctly they should not be significant. The advantage of the discussed medicine is also its reasonable cost.
